World-Class Business Portfolio With Improving Mid-Term Outlook

Maximize value of pipeline

HealthCare

- At the verge of a business transforming new product cycle
- Significant investment requirements to rejuvenate product portfolio
- Overweight in emerging markets
- World-class Consumer Health portfolio

Translating R&D more effectively into sales

CropScience

- Well-proven track record of R&D efficiency: launched 23 new AIs between 2000/2009
- Commercial effectiveness & efficiency initiatives initiated
- Fast growing BioScience (seeds & traits) business

Recover margins

MaterialScience

- A leader in its markets
- Unique global production network & technology base
- Key strength in applications research

Maximize value of pharma pipeline

Key Pharma Pipeline Assets – Potentially Transformational

		What it does	Status
Cardiology	Xarelto	inhibits blood clot formation	1st indication launched/ filed; phase III
	Riociguat	lowers blood pressure in the lung	phase III
Oncology	Nexavar	inhibits enzymes important for tumor growth	launched, additional indications in phase II/III
	Regorafenib	inhibits enzymes important for tumor growth	phase III
	Alpharadin	targeted treatment of bone metastases in prostate cancer	phase III
Eye Diseases	VEGF Trap-Eye	inhibits formation of new blood vessels	phase III
Imaging	Florbetaben	detects amyloid-beta plaques (Alzheimer's disease)	phase III

Investor Handout • Third Quarter 2010 • Page 5

ROCKET AF Study Xarelto Significantly Reduces The Risk of Stroke in AF Patients With Comparable Safety Versus Warfarin

Once-daily oral Xarelto was studied vs. dose-adjusted warfarin in patients with non-valvular atrial fibrillation at moderate to high risk of stroke.

- Active treatment with Xarelto was superior to warfarin in reducing the risk of stroke
- In the intent to treat population Xarelto showed comparable benefits to warfarin
- Superiority of Xarelto in key secondary efficacy composite endpoint of all-cause stroke, MI, vascular death and non-CNS-systemic embolism demonstrated
- Findings for the principal safety outcome (composite of major bleeding and clinically relevant non-major bleeding) were comparable between the two treatment arms
- Rates of major bleeding were comparable between the two treatment arms, patients in the Xarelto arm had significantly fewer
 - ▶ fatal bleeds,
 - ▶ intracranial hemorrhages
 - ▶ critical organ bleeds.
- The positive benefit-risk profile of Xarelto was confirmed. No evidence for impaired liver safety and no increase in major adverse cardiovascular events.

Investor Handout • Third Quarter 2010 • Page 6

MI: Myocardial infarction
CNS: Central nervous system

In All 7 Phase III Studies Reported Xarelto Demonstrated an Excellent Clinical Profile

Indication	Study	Clinical Trial Results#	
VTE prevention after orthopedic surgery	RECORD 12,729 patients, Xarelto vs enoxaparin	<ul style="list-style-type: none"> Superior efficacy: 52% relative risk reduction* Rates of major bleeding low. No statistically significant difference No signal for liver toxicity or cardiovascular rebound 	✓
Extended secondary prevention of VTE	EINSTEIN-Ext 1,197 patients, Xarelto vs placebo	<ul style="list-style-type: none"> Superior efficacy: 82% reduction of recurrent VTE Low incidence of major bleeding. No statistically significant difference No signal for liver toxicity – no increase in major adverse CV-events 	✓
DVT treatment	EINSTEIN-DVT 3,449 patients, Xarelto vs enoxaparin followed by VKA	<ul style="list-style-type: none"> Non-inferior efficacy Composite of major and clinically relevant non major bleeding similar with numerically lower major bleedings Significantly improved net clinical benefit ** No signal for impaired liver safety, no increase in major adverse CV events 	✓
Stroke prevention in atrial fibrillation	ROCKET-AF 14,269 patients, Xarelto vs VKA	<ul style="list-style-type: none"> Active treatment with rivaroxaban was superior to warfarin in reducing the risk for stroke in patients with AF. Non-inferiority vs. warfarin in ITT population Composite of major and clinically relevant non major bleeding similar Rates of major bleeding were comparable between the two treatment arms, in the rivaroxaban arm significantly fewer fatal bleeds, intracranial hemorrhages and critical organ bleeds No signal for impaired liver safety, no increase in major adverse CV events 	✓

#) Selection, for full data see publications: RECORD data published in NEJM and Lancet, EINSTEIN-Ext. presented at ASH 2009, EINSTEIN-DVT presented at ESC 2010; ROCKET-AF presented at AHA 2010
 *) Symptomatic VTE + all-cause mortality in pooled analysis of RECORD 1-4
 **) Secondary outcome defined as composite of primary efficacy endpoint plus major bleeding

Investor Handout • Third Quarter 2010 • Page 7

DVT: Deep vein thrombosis; PE: Pulmonary embolism; VTE: Venous thrombo-embolism; VKA: Vitamin K antagonist; CV: Cardiovascular; AF: Atrial fibrillation; ITT: Intention to treat

VEGF Trap-Eye Phase III program in Wet AMD

VIEW 1 (US) and VIEW 2 (ex-US) met primary endpoint.

- VIEW one year data demonstrate potential for less frequent dosing vs. standard of care with comparable vision maintenance
- Fixed dosing for 52 weeks will be followed by PRN dosing in the second year

Background wet AMD:

- Wet AMD due to abnormal blood vessel growth in the eye; accounts for approx. 90% of AMD-related blindness
- Leading cause of acquired blindness in the elderly
- Approx. 1.5 million patients annually in the US

VEGF-Trap-Eye	Comparator: Lucentis (ranibizumab)	Study outcome (1 year data)
0.5mg q4 weeks	0.5mg q4 weeks	non-inferiority shown*
2.0mg q4 weeks	0.5mg q4 weeks	non-inferiority shown*
2.0 mg q8 weeks (after 3 monthly doses)	0.5mg q4 weeks	non-inferiority shown*

* Statistical non-inferiority in the proportion of patients who maintained vision over 52 weeks compared to ranibizumab

Filing for Europe planned 1H 2011.

Expected Newsflow From Key Pharma Pipeline Assets

Expected or upcoming major news flow:

2010

ROCKET AF phase III trial in stroke prevention in A'fib patients	Data AHA 2010 ✓
VEGF Trap-Eye: First data from the VIEW phase III program in wet AMD	Q4 2010 ✓
First filings in DVT treatment and in stroke prevention in A'fib patients	Q4 2010e

2011

MAGELLAN trial in VTE prevention in medically ill patients	Data expected early 2011
EINSTEIN-PE	Completion summer 2011e
ATLAS TIMI 51	Completion summer 2011e
VEGF Trap-Eye: Phase III program in CRVO	Data expected 1H 2011
Riociguat: Phase III in PAH and CTEPH	Beyond 2011

Invest in emerging markets growth

Performance of Top 15 Large Pharma Companies in the “Pharmerging” Markets

Bayer shows:

- “Best ability to adapt to local markets”
- “Superior local execution capabilities”
- “A stable senior leadership team”
- “Continuous investments in mature products” (Glucobay or Adalat)

Source : IMS Health Incorporates „Pharmerging shake-up“ 2010

Bayer is One of The Leading International HealthCare Companies in China

Impressive growth

- Driven by both Pharma (+23%) and Consumer Health (+35%)
- Pharma portfolio includes innovative products like Nexavar, Scilin Insulin (launch 2010E) and Xarelto

Significant investment commitment

- Approx. 4,500 employees
- €100m over 5 years to set-up a global R&D center in China
- Beijing manufacturing site expansion (~€45m through 2015)
- Partnership with Tsinghua university (joint drug discovery, student support)

Investor Handout • Third Quarter 2010 • Page 12

All growth rates are Fx-adj.
Greater China includes PR China, Hongkong, Macau and Taiwan

CropScience in Brazil – Strong Growth in One of the World’s Largest Agchem Markets

- Brazil is the 2nd largest market for CropScience
- Bayer is one of the leading suppliers and growing strongly (20% CAGR between 2006 and 2009)
- Risk management systems in place to limit the potential impact of reduced credit availability
- Barter business expanded

Strong MaterialScience Foothold in China Generates Growth Opportunities

Percentage of Bayer MaterialScience sales generated in China

Leading the recovery

- >25% of 2009 global sales in AsiaPacific (21% in 2007)
- 16% of 2009 sales in China (12% in FY2007)
- China sales 49% (Fx adj.) above previous year in Q2'10

Major investment

- €2.1bn investment program in integrated polymer site in Shanghai, China
- Significant cost advantages through lower conversion costs and energy consumption
- Direct customer access through local PUR System Houses and PCS compounding facilities

CropScience: Translate R&D more effectively into sales

Investor Handout • Third Quarter 2010 • Page 16

New Products Generated Sales of Approx. €2bn in 2009

Sales of new active ingredients (A.I.s)

in € million

Agchem sales: Crop Protection and Environmental Science, excl. BioScience
* Crop Protection only: 33.5% in FY08, 36.4% in FY09

New active ingredients in 2009

- New active ingredients make for 33% of agrochemical sales
- Novel Herbicide products grew above average (+15%)

Investor Handout • Third Quarter 2010 • Page 17

Grow BioScience Sales to €1.4bn by 2018

Planned sales development

in € million

*2002 sales pro-forma Bayer + Aventis CropScience

Key growth drivers

- Fast growing established business in cotton, canola, rice and vegetables
- Introduction of new varieties
- Regional expansion
- Exploit traits potential through licensing agreements
- Extension of our crop-portfolio
- Significant R&D investment (~€130m in 2009; €200+m in 2012E)
- R&D capacities strengthened through acquisition of Athenix (2009)

Redirection of Resources to Improve Efficiencies and Cut Costs

Annual Savings €800m

Challenges:

- Yaz genericisation in the US earlier than expected
- Rising development costs
- Negative effects of health care reforms
- Margin pressure at CropScience

Investment-Opportunities:

- R&D pipeline
- New product launches
- BioScience expansion
- Emerging markets

Measures:

- Annual cost savings of €800m starting 2013, reinvestment of ~50%
- One-time-charges of around €1bn by end of 2012, ~€200m in Q4 2010, rest split into ~60% 2011 and ~40% 2012
