Further step to sharpen HealthCare focus

Bayer To Divest its Plasma Products Business To US Investors Cerberus and Ampersand

Kogenate[®] product line will remain in Bayer's portfolio

Leverkusen / December 13, 2004 — Bayer AG today announced that an agreement has been signed to contribute the assets of its worldwide plasma products business to NPS BioTherapeutics, Inc., a newly formed corporation controlled by affiliates of Cerberus Capital Management, L.P., New York, and Ampersand Ventures, Wellesley, Massachusetts. The total consideration to be received by Bayer amounts to approximately US \$590 million (approx. EUR 450 million), including cash, a 10 percent equity interest in NPS BioTherapeutics, Inc., retention of selected working capital items and contingent payments of up to US\$ 60 million. The transaction is expected to close in the first half of 2005 and is subject to regulatory approvals.

“Divesting the plasma business is another important step in the repositioning of our health care business,” commented Werner Wenning, CEO of Bayer AG. “In the future we will focus increasingly on our competencies in the consumer health business, on innovative medicines for humans and animals, and on high-performance diagnostic systems. Our acquisition of the OTC business of Roche and the pharmaceuticals alliance with Schering-Plough underscore the new strategic alignment.”

The agreement covers the products, facilities and employees representing the plasma portion of Bayer HealthCare's Biological Products Division. The recombinant factor VIII business, comprising the Kogenate[®] product line for the treatment of hemophilia A, is not part of the transaction and will remain in Bayer HealthCare's portfolio.

“Kogenate[®] is one of the most valuable and strategically important products in the Bayer HealthCare portfolio. It is integral to our long-term strategy as we continue to realign our business, and allows us to build on our leadership position in the global

hemophilia market,” said Arthur Higgins, Chairman of the Executive Committee of Bayer HealthCare.

Sales of Bayer’s plasma products in the first nine months of 2004 amounted to EUR 481 million. Key products include Polyglobin[®], Gamimune[®] N and Gamunex[®] for the treatment of immunodeficiency disorders, and Prolastin[®] for the treatment of congenital pulmonary emphysema. The plasma business unit, headquartered in Research Triangle Park, North Carolina, United States, employs approximately 1,600 people in the U.S.

“We are excited to invest in a company with the industry’s deepest product pipeline, excellent manufacturing expertise, leadership in pathogen safety research, and an unwavering commitment to its patients,” said Larry Stern, a member of the Cerberus Operations Group and Chairman of NPS BioTherapeutics, Inc.. Mr. Stern continued, “As part of this strategy, NPS BioTherapeutics will also acquire Precision Pharma Services, which currently provides fractionation services to the Bayer Plasma business. New focused ownership, in partnership with existing management, will further leverage NPS BioTherapeutics’ leadership position in the industry. We are committed to growing and strengthening the business while facilitating even better support of the care provider and patient community.”

About Bayer

Bayer is a research-based, growth-oriented, global enterprise that plans to concentrate in the future on its core competencies in the fields of health care, nutrition and innovative materials. It is therefore intended to place substantial parts of the existing chemicals and polymers activities into the new company, Lanxess, to be listed on the stock exchange by the beginning of 2005. The Bayer Group is committed to the principles of sustainable development – with economic growth, ecological integrity and social responsibility accorded equal priority in its corporate activities throughout the world. In 2003, Bayer employed some 115,400 people and

had sales of EUR 28.6 billion. Capital expenditures amounted to EUR 1.7 billion, the R&D budget to EUR 2.4 billion. For more information on Bayer, go to www.bayer.com.

Bayer HealthCare AG, a subgroup of Bayer AG with sales of approximately 8.9 billion Euro in 2003 is one of the world's leading, innovative companies in the health care and medical products industry.

The company combines the global activities of the divisions Animal Health, Biological Products, Consumer Care, Diabetes Care, Diagnostics and Pharmaceuticals. 34,600 people are employed by Bayer HealthCare worldwide.

Our aim is to discover and manufacture innovative products that will improve human and animal health worldwide. Our products enhance well-being and quality of life by diagnosing, preventing and treating disease.

About Cerberus Capital Management, L.P.

Founded in 1992, Cerberus Capital Management, L.P. is a New York based private investment firm, which manages in excess of \$14 billion of investment capital. Together with its affiliates, Cerberus owns a controlling interest in over 40 companies in a diverse array of businesses around the world, including operations in North America, Europe, and Asia. Cerberus is a value-oriented investor that seeks returns in partnership with its management teams through long-term, profitable operating performance.

About Ampersand Ventures

Ampersand, a private equity investment firm founded in 1988 as a spin-off of PaineWebber, is dedicated to building equity value through active collaboration. Ampersand pursues a stage-independent investment strategy across a broad range of industrial technology sectors. The majority of the firm's capital has been invested in a portfolio of corporate spin-offs, expansion financings, middle-market leveraged buyouts and turnaround recapitalizations. Ampersand, which has been an active investor in the blood products sector since 1995, is the majority owner of Precision Pharma, a contract fractionator that currently provides plasma fractionation services to Bayer.
